

Free Vision Screening

Location:

Date:

Time:

Bring your child, ages 6 months to 5 years old, for a quick and easy vision screening procedure that can detect most problems that cause poor vision in young children. The Operation KidSight screener will use the PediaVision SO-8 screening system. The volunteer takes a digital photo/measurement of the child's eyes from a comfortable distance of three (3) feet. Parent consent forms have been sent home with your child and must be returned prior to screening.
